

Embrace the Digital Future with **incadea's International Make Layer Solution**

incadea's **International Make Layer (IML)** was conceptually built on top of our robust DMS solution to meet OEM's diverse requirements without regularly changing the core system. IMLs contain functionalities, data templates, blueprints, and frameworks explicitly developed to fit the complex needs of multiple brands in one system. These include the required interfaces to the OEM systems, all make-specific logic, and the highly adaptable rules depending on the vehicle brand.

Functional concepts and frameworks such as IMLs, make incadea a global leader in software solutions within the automotive retail and wholesale markets driving **60+ leading automotive brands to increase growth globally.**

incadea presents a modern approach to technology, empowering OEMs, importers and dealerships accelerate business productivity and user experience.

Let's build great customer experiences together.

OEMs Integration

incadea's deep automotive **expertise**,

first-hand experience with **dealers worldwide**,

and strong relationships with the **largest OEMs**

enabled incadea to develop **globally certified manufacturer integrations**. IMLs updates and further OEM API integrations are regularly released to keep the integration level high and up to date using the latest technology available.

Contact **incadea** for details related to globally supported IMLs and the level of integration scope!
